

Alumni Mentorship & Mock Interview Platform

LAB-2

Epic 1: Mentor Discovery & Booking

Enable students to find, filter, and book sessions with alumni mentors based on domain expertise and availability.

Story ID	As a...	I want to...	So that...	Priority	Pts
AMP-4	As a student	search for mentors by domain (e.g., Embedded Systems, Cloud Computing)	I can find experts in my field of interest	High	3
AMP-5	As a student	filter mentors by company and availability	I can find mentors who match my specific needs and are free to meet	Medium	5
AMP-6	As a student	book a mentorship session with one click	the session is added to both calendars with a meeting link	High	3
AMP-7	As a student	see only available mentor slots	I don't waste time requesting unavailable times	High	3

Epic 2: Mentor Management, Feedback & Privacy

Allow alumni mentors to manage their schedules, conduct interviews, provide structured feedback, and ensure data privacy.

Story ID	As a...	I want to...	So that...	Priority	Pts
AMP-8	As an alumni mentor	set and update my weekly availability slots	students can see when I'm free for sessions	High	5
AMP-9	As an alumni mentor	have my updated availability reflect immediately in search results	students see accurate information	High	3
AMP-10	As an alumni mentor	conduct a mock interview and submit a structured scorecard with technical, communication, and overall ratings	students receive valuable feedback	High	8
AMP-11	As an alumni mentor	have the scorecard saved and visible to the student within 1 hour	feedback is timely and useful	High	3

Epic 3: Notifications & Data Privacy

Handle automated reminders for both students and mentors, and ensure user data is protected.

Story ID	As a...	I want to...	So that...	Priority	Pts
AMP-12	As a student	receive automated reminders 24 hours and 1 hour before my session	I don't forget or miss it	Medium	5
AMP-13	As a mentor	receive automated reminders before a scheduled session	I can prepare and show up on time	Medium	3
AMP-14	As a user	have my profile data securely stored and deleted within 24 hours of request	my privacy is protected	High	5
AMP-15	As a student	book a session in 3 clicks or fewer	the booking process is fast and frictionless	Medium	3

Summary Table

Epic	# of Stories	Total Story Points
Epic 1: Mentor Discovery & Booking	4	14
Epic 2: Mentor Management, Feedback & Privacy	4	19
Epic 3: Notifications & Data Privacy	4	16
TOTAL	12	49

Reflection Questions

1. Did your estimations reflect the actual effort?

Yes, the Fibonacci-based story points helped differentiate complexity. Simple tasks like AMP-7 (View only available slots) were estimated at 3 points, while complex tasks like AMP-10 (Submit structured scorecard) were estimated at 8 points. The burndown chart shows we completed all work within the sprint, indicating our estimates were accurate.

2. Was your backlog well-prioritized?

Yes, high-priority items focused on core functionality — mentor discovery (AMP-4), booking (AMP-6), availability management (AMP-8), and feedback (AMP-10). These were essential for the platform's value. Medium-priority items like reminders (AMP-12, AMP-13) were scheduled for later sprints.

3. How did your simulated sprint align with your plan?

Sprint 1 (22 points) was completed successfully, with all stories moved from To Do → In Progress → Done. Sprint 2 (18 points) and Sprint 3 (9 points) were also completed on time. The simulated team delivered all committed work within the 1-week sprint duration.

4. What insights did the burndown chart give about your team's capacity?

The burndown charts show a steady decline in remaining work, with the actual line tracking close to the ideal guideline. In Sprint 1, the team maintained consistent progress. The team completed all sprints on schedule, suggesting the current velocity (around 15-22 points per sprint) is sustainable. This indicates the team has good estimation practices and can reliably commit to similar amounts of work in future sprints.
